Los Osos
The Los Osos area which would be effected by a tsunami is primarily residential in nature. The area is likely to have a moderate amount of inundation in the event of a tsunami. There are two primary areas which can expect damage, with isolated homes scattered along the coastline. Los Osos only has two roads for entrance/egress: South Bay Blvd to the north and Los Osos Valley Rd to the south. In the event of a tsunami, it is possible that portions of South Bay Blvd will be flooded or damaged, so Los Osos Valley Rd is advised to be primary the primary route for access and evacuation.
